Aluminum Wheel Turns

# 2-axis aluminum wheel turning

Superb customized horizontal aluminum wheel turning centers are designed for high precision and faster machining across a board range of aluminum wheels and to meet demanding specs for higher productivity.

## PUMA AW560/660

# 4-axis aluminum wheel turning

Specialized aluminum wheel turning centers, PUMA VAW series redouble the machining productivity with its twin turrets, robust and systemized design construction.

## PUMA VAW700/800

# PUMA AW Series Main Spindle

PUMA AW560/660 Main Spindle

Max. spindle speed  
**3000 (2000)<sup>\*1</sup> r/min**

Motor(30 min)  
**37 kW**

<sup>\*1</sup>: PUMA AW660 & PUMA AW560 opt.

The powerful high-torque spindle motor provides power for heavy stock removal, greatly reducing the number of roughing passes required.

## Rapid Traverse

X-axis travel  
**16 m/min**

Z-axis travel  
**20 m/min**

- Perfect realization of servo driven feed system

## Turret

No. of tool station  
**12 station**

Index time  
(1-station swiveled)  
**0.25 s**

Fast indexing turret (indexing time:0.25second) designed for high productivity and take on all kinds of Aluminum Wheels.

# Suitable For Al. Wheel Machining

## High speed & high accuracy cutting

Doosan Al. wheel turn series finish aluminum wheels with improved efficiency, which is guaranteed by up 3000 r/min spindle speed and 0.002mm repeatability.

## Shower coolant system (Opt.)

The large volume of pressure coolant system is effectively to remove heat from the aluminum wheel and tool to assure consistent high precision.

## Easy chip removal

Mass of chips falls directly onto single-sheet saddle cover below for much more effective handling.

## Coolant system

Large-capacity chip flushing coolant system

## Operator's Panel

The operator panel is mounted on an adjustable pendant for easy viewing and accessibility during set-up and operation. The layout and location of the panel is ergonomically designed to maximize the efficiency of use and operator's convenience. Comprehensive alarm diagnostics are provided for the machine, control and programming errors.

## AL. Wheel System Application

Doosan Infracore cell manufacturing system for aluminum wheel with a wide variety of systems containing a broad range of flexibility and automation.

All operations(1st, 2nd, 3rd) required to finish wheel are packed by just one manufacturing cell. Each cell can be combined by parts flow connection equipment to form FMS.
